

# Security lighting

1/1

## **Safeguard your property with an ETSA Utilities security light**

At ETSA Utilities, we are committed to the safety of our employees, contractors, customers and the wider community.

An important part of this commitment is providing a service to install security lighting in public spaces to effectively help increase safety and security. Security lighting can also help to deter and detect intruders and often improves the amenity of an area at night.

## **How does it work?**

ETSA Utilities offers customers the opportunity to have a floodlight installed near their home or business.

The floodlight will operate automatically from dusk to dawn every night of the year. Lights must be able to be fixed to suitable existing ETSA Utilities stobie poles; unfortunately they can not be affixed to buildings or other free standing arrangements. ETSA Utilities will install, maintain and eventually remove the light when it's no longer required.

The floodlight could be used to:

- light a sign or business premises;
- light a specific space or object, such as a carpark or garden feature; or
- provide extra security for a business or residence at night time.

We provide and install two types of floodlights:

- A 360W high pressure sodium floodlight, which has a pleasant golden colour and provides high levels of light output.
- A 400W mercury vapour floodlight, which emits whiter tones of light.

## **What does it cost?**

There is an initial connection fee for the floodlight, which covers the light hardware, installation and eventual removal. Ongoing, there is a small annual maintenance and service fee from ETSA Utilities.

AGL will send a separate account to you for energy in line with current electricity costs. For a full schedule of tariffs, visit [www.agl.com.au](http://www.agl.com.au).

## **Where to from here?**

To arrange for an on-site assessment of your requirements, contact 1300 650 014. For further details or technical information, please contact the ETSA Utilities Lighting Group on 08 8292 0460.
